Soil Health Incentive	Payment Rate	Unit	Total Acres	Paid Acres	Payment Amount

Total CFF Reimbursement for soil health practices

Participants are capped at a max payment of \$3,000 for any one or combination of practices, regardless of additional acres implementing soil health practices. Cost - sharing is on a first come- first served basis, implementing a practice does not guarantee payment and all required documents must be submitted to Ozaukee County prior to reimbursement. Any given field can only receive payments per practice up to three years. All payments will be reimbursed in December 2022, all required documents must be received. *Harvestable Buffers do not have to meet NRCS standards if not receiving NRCS funds, but do have to be a minimum of 15 feet wide. **Low Disturbance Manure Injection does include compliant surface application on alfalfa and cover crops. ***Grazing stipend may cover costs of: Fencing, water systems, pasture seeding, pasture maintenance, seed, etc. ****Equipment Conversion stipend may cover costs of any update of an existing Ag Implement to that of a lesser soil disturbance, call for approval of such conversion. Receipts of purchase and photos of implement before and after are required. *****Nutrient Test include: Forage, Manure, PSNT, Tissue, Biomass. Receipts of test and their results are required.

Terms & Conditions

I, _____, Will/have installed the above listed soil health practices on. In accepting thundersand and agree to the following conditions.

- 1) For Cover Crops, the practice has been installed in time in fall to allow for germination to provide substantial growth and/or ground cover before winter. The Cover Crop will be left in place until spring.
- 2) For No-till, there must be 30% residue left after planting to be considered conservation tillage and eligible for the incentive, and must remain no-tilled until spring.
- 3) For Low Disturbance Manure Application, fields shall remain no-tilled until the following spring. Surface applications on established alfalfa and cover crops at rates compliant in 590 Nutrient Management Plans, are acceptable.
- 4) For Harvestable Buffers, they do not need to meet NRCS standards unless NRCS funds are contributed, but a minimum width of 15 feet is required and it must stay in place for a minimum of ten years.
